

**Team ID-PNT2022TMID47980**  
**Industry-specific intelligent fire management system**  
**Customer Problem Statement**

<b>I am</b>	<b>A customer</b>	<b>I need a quality and innovative fire management system</b>
<b>I am trying to</b>	<b>Ensure the fire safety in my industry</b>	<b>I can avoid the fire explosion in my Industry and keep all my products safe from the fire spread</b>
<b>But</b>	<b>I want to handle it easily</b>	<b>By doing fire safety in the form of automation using the recent easy technologies</b>
<b>Because</b>	<b>The fire explosion should be automatically detected without any human monitoring</b>	<b>The fire explosion at the ignition stage can be detected and controlled</b>
<b>Which makes me feel</b>	<b>That my Industry and my workers are safe</b>	<b>It saves the Industry and lives of the workers</b>
